Forecast for Friday 27 Jan 2023

Weather: A dry bright morning and early afternoon for most with some long sunny periods. Cloud then increasing across the Perthshire Hills from early to mid-afternoon with some hill fog developing, extending to all but the most sheltered Aberdeenshire Hills by evening. Generally overcast in the evening with some patchy light rain or drizzle developing, starting off as freezing rain, sleet or even snow flurries above 900m.

Chance of cloud-free hill tops above 800m: 90% falling 70% by mid-afternoon and 30% by evening, chances reducing quicker further to the west.

Low Cloud and visibility: Little cloud at first but layered cloud arriving at 600-900m from the west as the afternoon goes on. Visibility initially very good, but deteriorating as rain and drizzle develops in the evening, and of course very poor in the cloud-induced hill fog.

Met Office Aberdeen Meteorologist's View
A deceptively sunny start but cloud and hill fog arriving over much of the area later

Forecast for Saturday 28 Jan 2023
Weather: Low cloud and light rain or drizzle clearing south in the early hours. Then the day dry and bright with broken or well broken cloud allowing some sunshine at times. Cloud becoming more extensive in the evening, though apart from the odd spot of rain or summit snow flurry it will stay dry.

Maximum wind: Southwesterly 20 gusts 30mph increasing 30 gusts 40mph in the evening.

Chance of cloud-free hill tops above 800m: 10% in early hours then 80-90% by daybreak, falling 30% during the evening.

Low Cloud and visibility: Extensive low cloud at 300-600m in early hours with poor visibility in drizzle quickly clearing then well broken cloud during the day, above 1000m, mainly in western Perthshire, the cloud becoming more extensive in the evening and lowering 700-900m. By daylight visibility away from the cloud will be good.

Temperature: **Glens:** Minus 1 Celsius at dawn rising to Plus 5 in the afternoon.
At 800m: Plus 4 at midnight falling to 0 degrees by morning
Freezing level: 1200m at midnight falling 800m by morning
